

SECRET/NOFORN - SKEET CHANNELS ONLY

PROJECT SUN STREAK (U)

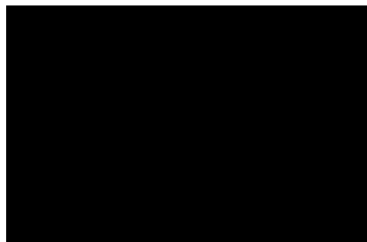

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

Session Procedures Report (S/NF/SK)

-----  
PROJECT NUMBER: 8715                      SESSION NUMBER: 3  
DATE OF SESSION: 2 OCT 87              TARGET COUNTRY:  
REFERENCE:                      MISSION STATUS:  
TECHNIQUE UTILIZED: CRV              SOURCE IDENTIFIER: 011  
-----

1. (S/NF/SK) Monitor Tasking: Attempt to identify the "end use" of the product(s) leaving the target (facility).
2. (S/NF/SK) Source Tasking: The Source was instructed to begin the session in Stage IV. Directions were to "determine whether anything connected with the target leaves the area identified in session #2" and, if so, "describe whatever it is that is taken out and track it to its destination".
3. (S/NF/SK) Summary: The Source's summary is attached. Please note that the "secured complex" is not the original target site (Refer to session #2).
4. (S/NF/SK) Comments: As the session progressed, it became very difficult for the Source to avoid the idea of "uranium/plutonium reprocessing", etc. (see data). Therefore, as insurance against AOL drive, both monitor and Source jointly agreed to a cooling-off period prior to proceeding against this target.

## SESSION SUMMARY

SESSION: 02 OCT 87, 1315-1405 HRS

SOURCE [REDACTED] 011

SG1J

The target is a product. At this time the product is leaving a secured complex in a large, white van. The van is stopped at the main gate and paperwork is being processed by an armed, uniformed security guard. This appears to be a routine action. The inside of this van is spacious, uncluttered, and there are shelves lining each side of the interior. There is also a heavy-gauge, wire-mesh divider present. Its function and description are unknown at this time.

The product of importance, located inside this van appear to be *like analysis*  
*yes*  
small, heavy, cylindrical, pellet-like objects. It feels metallic, but not quite. An impression of a powdery substance, in solid form is present.

COMMENT: Getting an impression of a controlled, hazardous material. AOL - like radioactive material.

02 OCT 87  
1315 HRS

S-2 D AI EI T I AOL A/S

4½ - at the gate is a security checkpoint. There is a guardhouse, but the guard is outside with a clipboard stopping a large white van that is preparing to leave the complex. There is more than one security guard. They are uniformed and armed, but they are not necessarily military. Overwhelming impression of dark blue uniform. This is a routine movement.

LARGE WHITE VAN?

grey  
tan  
brown  
empty

shelves  
heavy wire  
divider  
objects

small  
solid  
heavy  
small
